

Roller Way & Flat Roller Cage

Roller Way
Flat Roller Cage

Roller Way

RW

SR

GSN

Points

1 High rigidity and accuracy

Since the high accuracy roller is built into the highly flat surface way finished by accurate ground, the product has a high rigidity and high accuracy. Also because the variation of operation height can be selected in the unit of 2 μm, the load can be evenly distributed even in the multiple-use environment.

2 Smooth motion

The structure of all models lets the roller to be guided accurately without creating skew, yielding an extremely stable and smooth linear motion.

Identification Number and Specification

Example of an identification number

The specifications of RW, SR and GSN are indicated by the identification number. Indicate the identification number, consisting of a model code, dimensions, a part code, a classification symbol, and a selection code for each specification to apply.

	1	2	3	4	5
	RW	40	UU	SP	B4
	SR	2050		SP	B4
	GSN	20		SP	B4

1 Model Model code Page II - 196

Shape	Model	Size					
		14	16	24	32	48	64
	RWB	○	○	○	○	○	○

3 Wiper seal

Without wiper seal	: No symbol	Applicable to Roller Way RW.
With wiper seal	: UU	Attach the wiper seal in the linear motion direction. This wiper seal is made of special synthetic rubber in double-lipped shape and has high removal performance against foreign substances.

4 Accuracy class

Ordinary	: No symbol	For applicable accuracy class, see Table 2.1 and Table 2.2.
High	: H	
Precision	: P	For details of accuracy class, see Table 3.1, Table 3.2, and Table 4.
Super precision	: SP	

5 Selection class

When many are used on the same surface, it is required to use those with the same selection code from tolerances of dimensions in *H* of Table 4 to evenly distribute the load. When tolerances of dimensions of *H* is not specified, please specify a classification symbol only.

Table 2.1 Application of accuracy class of RW, SR and GSN (Metric series)

Size	Class (classification symbol)			
	Ordinary ⁽¹⁾ (No symbol)	High (H)	Precision (P)	Super precision (SP)

Precaution for Use

1 Raceway

Recommended values for surface hardness and roughness of mating raceway are shown in Table 5 and the recommended value for the minimum effective hardening depth is shown in Table 6.1 and Table 6.2.

Table 5 Surface hardness and roughness of raceway

Item	Recommended value	Remark
Surface hardness	58~64HRC	When the surface hardness is low, multiply the load rating by hardness factor (1).
Surface roughness	0.2 μmRa or lower (0.8 μmRy or lower)	Where accuracy standard is low, around 0.8 μmRa (3.2 μmRy) is also allowed.

Note (1) For hardness factor, refer to Fig. 3 in page III-5.

Table 6.1 Minimum effective hardening depth of raceway (RW and RWB) unit: mm

Identification number	Recommended value for minimum effective hardening depth
RW 26 RWB 14	0.8
RW 30 RWB 16	1.0
RW 40 RWB 24	1.5
RW 50 RWB 32	2.0
RW 70 RWB 48	2.5
RW 95 RWB 64	3.0

Table 6.2 Minimum effective hardening depth of raceway (SR and GSN) unit: mm

Identification number	Recommended value for minimum effective hardening depth
SR 15 GSN 15	0.8
SR 20 GSN 20	0.8
SR 25 GSN 25	1.0
SR 32 GSN 32	1.0
SR 40 GSN 40	1.5
SR 50 GSN 50	2.0

2 Accuracy of mounting surface

For accuracy of mounting surface, values in Table 7.1 and Table 7.2 are recommended.

Table 7.1 Accuracy of mounting surface (RW and RWB)

Item	Recommended value
	0.02/100 or lower
	0.015/100 or lower
	0.05/100 or lower

Table 7.2 Accuracy of mounting surface (SR and GSN)

Item	Recommended value
	0.02/100 or lower
	0.015/100 or lower
	0.05/100 or lower

3 Groove machining on SR and GSN mounting surface

When mounting SR and GSN to the groove-machined mounting surface, the groove depth E should be deeper than the height from the bottom surface of the way to the bottom of the SR and GSN to provide clearance for oil pool. (See Fig. 2.)

Other than the above, groove width W corresponding to the width W_1 for SR should be as wide as clearance fit and the relation between the clearance and the groove position on the reference surface side must be considered.

4 Operating temperature

The maximum operating temperature is 120°C and temperature up to 100°C is allowed for continuous operation. When the temperature exceeds 100°C, contact IKO.

Precaution for Mounting

1 Reference mounting surface

To mount RW, RWB, SR, and GSN in the linear motion direction, mount them by referring the opposite side of the  mark on the way end as reference surface. (See Fig. 3.) In addition, the surface under load is the upside of the  mark on the way end seen as the normal position.

2 How to mount SR and GSN

To mount it, fix the way directly to a table or a bed with bolts, or fix it with pressure plate as indicated in Fig. 4. For SR, mounting with pressure plate is recommended.
